**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Information Disclosure Statement filed on 3/16/04 has been received.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,4-8,10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Fiedler et al (U. S. Patent no. 4,042,259).

See figures 2-4 damper 24, locking projection 43, locking bore 49, bolt 44, bolt bores in lugs 43

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3,9, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fielder et al in view of Hurst et al (U. S. Patent no. 6,161,822).

Fielder et al is relied upon as above. Fielder et al does not disclose the use of hook-shaped locking projection. Hurst et al teaches the use of hook-shaped locking

projections 39,41 to temporarily attach a mount plate of a damper and then securing with fasteners 44. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use hook-shaped locking projections as taught by Hurst et al in the damper mount of Fielder et al as it limits the amount of rotation before the locking projections are engaged. This makes it easier to line up the bolt bores since the damper can not be rotated past alignment and thus easier to assembly.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.
